

## DRUGS THAT MAY CAUSE PHOTSENSITIVITY

### ACNE MEDICATIONS

Isotretinoin (Accutane)  
Tretinoin (Retin-A)

### ANTICANCER DRUGS

Dacarbazine (DTIC-Dome)  
Fluorouracil (Fluoroplex & others)  
Methotrexate (Mexate & others)  
Vinblastine (Veiban)

### ANTI-ARTHRITICS

Gold Salt thiomalate (Solganol)

### ANTIDEPRESSANTS

Amitriptyline (Elavil & others)  
Bupropion  
Clonipramine  
Desipramine (Norpramin, Petrofrane)  
Doxepin (Adapin, Sinequan)  
Fluoxetine (Prozac)  
Imipramine (Tofranil & others)  
Maprotiline  
Mirtazapine (Remuron)  
Nortriptylin (Aventyl, Pamelor)  
Paroxetine (Paxil)  
Protriptyline (Vivactil)  
Sertraline (Zoloft)  
Tricyclics (class)  
Trimipramine (Surmontil)

### ANTINEOPLASTIC MEDICATIONS

Dacarbazine (DTIC-Dome)  
Fluorouracil (Fluoroplex & others)  
Methotrexate (Mexate & others)  
Vinblastine (Velban)

### ANTI-HISTAMINES

Astemizole  
Brompheniramine  
Cetirizine  
Cyproheptadine (Periactin)  
Diphenhydramine (Benadryl & others)  
Claritin  
Terfenadine

### ANTI-INFLAMMATORY

Celecoxib (Celebrex)  
Ibuprofen (Motrin)  
Naproxen (Naprosyn)

### ANTIBIOTICS

Azithromycin (Zithromax)  
Demacloxycline (Declomycin & others)  
Doxycycline (Vibramycin & others)  
Griseofluvin (Fulvicin-U/F & others)  
Hexachlorophene  
Lomefloxacin (Maxaquin)  
Methacycline (Randomycin)  
Minocycline  
Nalidixic acid (NegGram & others)  
Oxytetracycline (Terramycin & others)  
Quinolones (class)  
Sulfonamides (class)  
Sulfacyntine  
Sulfamethazine  
Sulfamethizole  
Sulfamethoxazole/trimethoprim (Bactrim, Septra)  
Sulfasalazine (Azulfadine)  
Sulfathiazole  
Sulfisoxazole (Gantrisin)  
Tetracyclines (class)

### ANTIPSYCHOTICS

Chlorpromazine (Thorazine & others)  
Fluphenazine (Permitil, Prolixin)  
Haloperidol (Haldol)  
Perphenazine (Trilafon)  
Piperacetazine (Quide)  
Prochlorperazine (Compazine & others)  
Risperidone  
Promethazine (Phenergan & others)  
Thioridazine (Mellaril)  
Trifluoperazine (Stelazine & others)  
Triflupromazine (Vesprin)  
Trichlormethiazide (Metahydrin & others)  
Thiazides (Diuril, HydroDIURIL)  
Thiothixene  
Trimeprazine

## DRUGS THAT MAY CAUSE PHOTSENSITIVITY CONTINUED

### HYPOGLYCEMICS

Acetohexamide (Dymelor)  
Trimeprazine (Termaril)  
Chlorpropamide (Diabinese, Insulase)  
Tolazamide (Tolinase)  
Tolbutamide (Orinase & others)  
Glimipiride  
Glipizide  
Glybuide  
Tolazimide (Tolinase)  
Tolbutamide (Orinase & others)

### CARDIAC MEDICATIONS

ACE inhibitors (Vasotec)  
Amiodarone (Cordarone)  
Diltiazem (Cardizem)  
Disopyramide (Norpace)  
Losartan  
Llovastatin (Mevacor)  
Pravastatin (Pravachol)  
Quinidine  
Sotalol Simvastatin (Zocor)

### CHELATING AGENTS

### DIURETICS

Acetazolamide (Diamox)  
Amiloride (Midamor)  
Bendroflumethiazide (Naturetin & others) Benzthiazide  
(Exna & others)  
Chlorothiazide (Diuril & others)  
Chlorathaldone  
Cyclothiazide (Anhydron)  
Furosemide (Lasix)  
Hydroflumethiazide (Diucardin & others)  
Hydrochlorothiazide (HydroDIURIL & others)  
Methyclothiazide (Aquatensen, Enduron)  
Metolazone (Diulo, Zaroxolyn)  
Polythiazide (Renese)  
Quinethazone (Hydromox)  
Trichlormethiazide (Metahydrin & others)  
Thiazides (class)

### HORMONAL

Estrogen Replacement  
Oral Contraceptives  
Other Hormones

### HERBAL MEDICINES

Additional Plant Families  
Agrimony (Agrimonia Eupatoria)  
Angelica Root & Fruit (Angelica Species)  
Bergamot Peel (Citrus Bergamia)  
Bitter Orange Peel (Citrus Aurantium)  
Buttercup Plant (Rannunculus Species)  
Carrot Family  
Celery (Apium Graveolens)  
Cow Parsnip (Heracleum Lanatum)  
Dill (Anthium Graveolens)  
Fennel (Foeniculum Vulgare)  
Fig (Ficus Carica)  
Goosefoot (Chenopodium Species)  
Khella Fruit (Ammi Visnaga)  
Lemon Peel (Citrus Limonia)  
Lomatium (Lomatium Dissectum)  
Lovage Root (Levisticum Officinale)  
Parsley (Petroselinum Sativum)  
Psoralea Seeds (Cullen Corylifolia, Psoralea  
Corylifolia)  
Queen Anne's Lace (Daucus Carota)  
Rue Leaves (Ruta Graveolens)  
St Johns Wart (Hypericum Perforatum)  
Yarrow Plant (Achillea Millefolium)

### SUNSCREENS

Containing Benzophenones  
PABA (P-Aminobenzoic Acid)

**The use of potential photosensitizers alone or in combination may induce hyper-pigmentation, hypo-pigmentation, dermatitis, blister formation or burns.**

**Increased sensitivity to the laser procedure may occur.**

**Perform a test treatment in any situation when the outcome is questionable.**

**Always check OTC labels for complete ingredients.**
