

## PRE-CONDITIONING THE SKIN

Skin Pre-Conditioning is to prepare the skin before any treatment.

You may not start a series of chemical peels before pre-conditioning prior to EACH peel. The longer you “prep” the skin, the better the results.

The skin should be pre-conditioned for 4 weeks or more with DERModality “home support system products for chemical peels” to insure quality results. If a client is a Fitzpatrick 5 & 6, you must not offer a chemical peel before pre-conditioning with DERModality HQ Lightening Gel.

Hydroquinone is a Skin Lightening agent that inhibits and suppresses melanin making the skin more even and easier to peel.

“Home pre-condition support system products for chemical peels” include: HQ Lightening Gel, Vitamin A Intense and/or a series of Multi-fruit Pumpkin Peels.

Professional pre-condition support system pre-treatments must include Pumpkin Peel, Retinol 10/10 or Long Island Ice Tea Peel (Retinol 15/15)

## HOME USAGE

Morning or Night – every other day until skin is acclimated. Apply 2-3 drops HQ Lightening Gel and/or Vitamin A Intense all over the face, neck and chest if you’re planning on doing that area; extra on dark areas - finish with Sun Block SPF 30 and up if using in the morning.

If you miss, cancel or change your appointment with less than 24 hours notice, you will be charged \$50 for the first appt, \$75 thereafter \_\_\_\_\_ (initial)
